EXPERIENCE

Senior Software Architect   June 2013 - Present
HealthPocket, Inc. / Benefytt Technologies, Inc. • *healthinsurance.com, healthpocket.com*

- Contributed to data schemas, data pipelines, and data persistence for shared API server serving several websites: user sessions, e-commerce product filtering and display, customer data collection and product enrollment, analysis of customer data from third-party APIs
- Developed and maintained the full stack of 10+ health insurance e-commerce websites using modern back-end and front-end frameworks/libraries
- Administered and maintained AWS server infrastructure for these 10+ websites as well as QA, staging servers and multiple feature-testing servers for each site
- Solely responsible for automated pull request testing and continuous deployment pipelines
- Managed a headless CMS to provide content for articles, product details, and white-labeled sites
- Solely developed and implemented an internal landing page creation tool with live feedback

Co-founder and Chief Technology Officer   Aug 2015 - Jan 2017
PrioritySales, Inc.

- Co-founded company from scratch to over 10,000 active users
- Solely developed a browser extension, the company's core product
- Saved thousands of man-hours by providing automated sales and lead prospecting tools
- Company was based on our mobile app idea that won second place in a Salesforce hackathon

Web Developer Intern   June 2012 - Aug 2012
Stripes39 • *stripes39.com*

- Added searching, filtering, and other improvements to an internal SEO tool used to drive business decisions for the company's portfolio of websites
- Developed logic for a tool that would spin content from a data set for dozens of sites
- Launched multiple websites tailored to rank first-page on search engines

EDUCATION

Massachusetts Institute of Technology   Sep 2011 - May 2013
Completed 2 years towards a bachelor's degree in Electrical Engineering and Computer Science
